

Amendments to the Specification

Page 1, please replace paragraph [0003] with the following rewritten paragraph [0003]:

[0003] However, since polyolefin resin has low polarity and small intermolecular force, it has problems in that coating property, ~~adhesive property to and compatibility with polar material~~ adhesive property to and compatibility with polar material, and scratch resistance are inferior.

Page 2, please replace paragraph [0007] with the following rewritten paragraph [0007]:

[0007] However, in the graft copolymer disclosed in Patent Documents 1 and 2, since the vinyl copolymer segment formed from a vinyl monomer having carboxylic acid is directly bonded to polypropylene resin or ethylene- α -olefin copolymerized rubber, the improvement effects on ~~adhesive property and scratch resistance are not sufficient and further~~ adhesive property and scratch resistance are not sufficient and further improvements have been expected.

Page 3, please replace paragraph [0012] with the following rewritten paragraph [0012]:

[0012] The present invention furthermore provides a method for producing the graft copolymer. In that method, a vinyl monomer having ~~an acid is reacted with polyolefin resin having a β -substituted propenyl-~~ an acid is reacted with polyolefin resin having a β -substituted propenyl group as a pendant.
